

Spare Parts

Always on track

Glova is a **European vacuum toilet system** manufacturer and an important key player in the rail industry, offering engineering and consultancy for toilet refurbishment and overhaul. We are capable of supplying wear and tear parts for all the major train toilet systems like Evac, Dowald, Semvac, Temoinsa or Frensissemi and is therefore a unique alternative to the OEM.

Wear and tear parts

Two of the players closed down their production twelve years ago but we are still capable of supplying spares as well as test equipment for these old systems.

A key figure for many of the train operators are reliable and fast supplies they can rely upon.

The Glova test equipment is a great help for clients who specialize in overhaul work and toilet repairs.

Glova spare parts are always either identical and from the same manufacturer as the OEM part or tested up against the original parts.

By making a detailed comparison with the OEM part we ensure that the Glova parts will provide a reliable service. At Glova we often hear that it is our reactive appearance and the smooth delivery on time which makes us a preferred supplier.

Feel free to contact us to see if we can deliver the spares that you need.
